Executive Summary

Reliance Label Solutions is a Kansas-based labeling solution company. They are relaunching their Vision software, a program that offers comprehensive label tracking and customization. They currently provide services to many petroleum corporations and are looking to expand their reach into the chemical manufacturing industry by unlocking the potential of Vision.

Project Summary

Through working with the Purdue Marketing Association, Reliance Label Solutions wishes to define branding, marketing, and sales strategy to extend their reach into different markets. To do this, the Purdue Marketing Association will provide an array of deliverables mentioned further in this document; these deliverables will be the scope of the project.

Goals

- Define branding for the Vision Labeling Solution Software.
- Develop updated content that fits with a newly designed brand for the Vision software solution.
- Define subscription bundling options for Vision's different customer bases.

Deliverables for Reliance Label Solutions

- Comprehensive Brand Kit
 - Logos & Variations, Taglines, Colors, Typography, Tone, Brand Voice, Visuals, Assets
- Revamped Subscription Bundling Service Copyrighting
- Sales Collateral
- LinkedIn Posts

Agent Roles

- **Brand Strategist/Researcher:** Works on branding, value proposition, and tone development.
- **Copywriter:** Handles messaging, tone, and all written deliverables like taglines, LinkedIn posts, and sales collateral.
- **Graphic Designer:** Responsible for visual elements, including mood boards, collateral, and design aspects of posts.
- **Marketing Strategist & Competitor Research:** Focuses on subscription bundling and sales strategy. References to much of the research with other competitors.
- **Content Marketer & Marketing Analytics:** Develops content calendars, LinkedIn post drafts, and short form post strategies. Look at past LinkedIn posts, determine what has worked, and develop new ideas based on updated value propositions.
